Contents of Volume 24

Number 1

1 Foreword
H. R. THOMAS, R. N. YONG (UK)

3 Numerical analysis of gas-bubble flow in water-filled natural fractures
K. KOSTAKIS, J. P. HARRISON (UK)

29 Solving the advection–dispersion equation using the discrete puff particle method
J. D. McKINLEY (UK)

41 Finite element modelling of multiphase immiscible flow in deforming porous media for subsurface systems
N. A. RAHMAN, R. W. LEWIS (UK)

65 A fully coupled heat and mass transfer model incorporating contaminant gas transfer in an unsaturated porous medium
H. R. THOMAS, W. J. FERGUSON (UK)

I Calendar of Events

Number 2

89 Efficient finite element techniques for limit analysis of suction caissons under lateral loads
B. SUKUMARAN, W. O. MCCARRON, P. JEANJEAN, H. ABOUSEEDA (USA)

109 Parameter estimation using extended Bayesian method in tunnelling
I.-M. LEE, D.-H. KIM (Korea)

125 Stress and displacement fields around a deep circular tunnel with partial sealing
X. LI (Mexico)

141 Dynamic response analysis of the machine foundations on a nonhomogeneous soil layer
M. Z. ASIK (Turkey)

I Calendar of Events

0266-352X/99/$ - see front matter © 1999 Elsevier Science Ltd. All rights reserved.

Number 3

155 Selection of load–transfer functions for passive lateral loading of pile groups
M.F. BRANSBY (Australia), S. SPRINGMAN (Switzerland)

185 Multi-wave transient and harmonic infinite elements for two-dimensional unbounded domain problems
H.R. YERLI, B. TEMEL, E.KIRAL (Turkey)

207 Triaxial compression behavior of sand and gravel using artificial neural networks (ANN)
D. PENUMADU, R. ZHAO (USA)

231 Finite element analysis of short piles in expansive soils
Y.E-A. MOHAMEDZEIN, M.G. MOHAMED, A.M. EL SHARIEF (Sudan)

I Calendar of Events

Number 4

245 An algorithm for detecting inter-ellipsoid contacts
H. OUADFEL, L. ROTHENBURG (Canada)

265 Theory of one dimensional consolidation of two-layered soil with partially drained boundaries
K.-H. XIE, X.-Y. XIE, X. GAO (PR China)

279 Parameter identification of viscoelastic materials
T. OHKAMI (Japan), G. SWOBODA (Austria)

297 Dynamic analysis of pile foundations in time-domain using Lanczos vectors
R. VENUGOPALA RAO, N.S.V. KAMESWARA RAO (India)

I Calendar of Events

III Contents of Volume 24
